I build the systems an operations team runs on: CRM automation, data pipelines, dashboards, integrations and the internal apps on top of them. At qlub I design and build the internal tools, automations and data pipelines that account management, customer success and leadership use across the UAE and Qatar. Set three Guinness World Records titles (one still stands).

EXPERIENCE

qlub (QR pay-at-table fintech) · **Operations Strategy Analyst** · Dubai Jul 2025 – Present

- Designed, built and run qlub's internal operations platform (React, Netlify Functions, Supabase/Postgres, Google sign-in, row-level security): 8 live dashboards, 19 process guides, forms and the scheduled data jobs behind them, used daily by operations, support and leadership.
- Built self-service onboarding for a new merchant vertical in 30 days: secure client links with KYC and IBAN validation, a review step, and one-click setup across the internal systems, CRM, Notion and Slack, including print-ready artwork.
- Built ETL from Tableau (REST and VizQL Data Service) and Zoho CRM into Postgres every four hours, reconciled to match Tableau's own totals, and the Zoho Analytics SQL reports behind the weekly performance reviews.
- Built the Zoho CRM task automation (Deluge) across the UAE and Qatar orgs that checks every live venue daily and creates, assigns and closes account-manager tasks when performance thresholds are crossed; most CRM tasks now come from it.
- Replaced a spreadsheet relay with a signed, idempotent webhook that files production alerts straight into Zoho Desk; also built Desk-Trello two-way sync, WhatsApp and Slack alerting, and a weekly WhatsApp market summary for leadership.
- Built a difference-in-differences model to measure a staff incentive programme against a control group, and a monthly report on merchants' public ratings after go-live (Python, Playwright).

GetDopamine · **Web Development Intern** · Dubai May 2025 – Jul 2025

Built Laravel/PHP features, integrated the WhatsApp Business API and other third-party APIs, and contributed to the Vue.js front end.

Dunkin' Donuts · **Data Science Intern** · Dubai Oct 2024 – Apr 2025

Built and compared demand forecasts for 80+ stores (XGBoost, Prophet; RMSE-based selection) and a Next.js dashboard for comparing models by store. Won 1st place at the UOWD Innovation Fair 2025 (ZenAI demand forecasting).

Asian Street by Thai · **Marketing Manager** · Dubai Sep 2022 – Sep 2024

Built the restaurant's online presence from scratch (Talabat, Careem, Noon, Google Business, paid social) and used analytics and platform data to steer spend and menus.

PROJECTS

Mifolio · personal finance tracker · Next.js, Supabase, Claude API 2026

Reads bank SMS, email and Apple Wallet alerts in near real time (iPhone Shortcuts, Apps Script), merges duplicates across channels, and categorises spend with merchant rules plus Claude.

University · XGBoost/PySpark real-estate valuation · Azure data lake and Power BI · NEAT game agent 2023 – 2025

EDUCATION

University of Wollongong in Dubai · BSc Computer Science (Big Data and AI) · Distinction Jan 2023 – Jul 2025

SKILLS

Languages: JavaScript / Node.js, Python, SQL, Deluge, Google Apps Script, PHP, Java, C++, VBA

Data: Tableau (REST, VizQL Data Service), Zoho Analytics, BigQuery, Power BI, PySpark, Azure Data Factory, pandas

Platforms: React, Next.js, Netlify Functions, Supabase / Postgres (RLS), AWS Lambda and S3, GitHub Actions

Integrations: Zoho CRM, Desk and Forms; Slack API; WhatsApp Cloud API; Cequens; Trello; Notion; Google Workspace APIs; Playwright

AI tools: Claude Code, Cursor, ChatGPT, used as pair programmers

Certifications: IBM Artificial Intelligence Fundamentals (2024), Google Fundamentals of Digital Marketing (2024)
